

LAUSANNE (SUI), April 15, 2022

Dear friends,

I want to congratulate all **ACRO judges** who passed the online test, maintain their category or received their Category 4 brevet. We have more international judges in more countries and this will only help Acrobatic Gymnastics to develop around the World.

World Age Group Competitions and World Championships in Baku

Thank you, BAKU!

Covid-19 and the War in Ukraine had a big impact on our competitions in Baku, but thanks to the effort, collaboration and support of everyone, it was still a celebration for our beautiful discipline that showed a high level of technical skills and Artistic performances but also that blind trust, responsibility and friendship between the partners are crucial in ACRO.

The World Games in Birmingham USA is our next World event. Let's show ACRO to the World in the best possible way, and of course, we are looking forward to meet again with all our National Federation in 2 years in Israel at our next World Championships.

Additional clarifications and corrections in the ACRO documents after the World Championships:

Please make the following corrections, identified in yellow, in the ACRO COP, AGR and TOD 2022 – these will be updated and corrected in the final versions, to be published in April 2022.

1. AGR:

Base Value	12	Plus	2
ID Code	AG MGB 5	Plus	A

2. COP:

Clarification:

To receive difficulty for 2 different Top positions of the same box it is **not allowed** to perform those two static holds from the same category (BOX page 15 General Rules) one after another **without** anything (e.g. motion of the base) in between.

Example Mount to Mexican 3" and then deep Mexican 3".

Clarification:

20.18 (4th bullet point) - The top/base is not allowed to use an additional/different point of support in the static hold **during** a transition **for the Top's Start position** to be credited with difficulty.

In this case, when an additional/different point of support is used by the top/base during the transition, the top is considered to be in a position of no value, therefore the difficulty value of the top is zero (0), but the transition value for the base is given. The static hold before the transition and the static hold after the transition may be on different points of support.

Promotion of ACRO by social media:

When something happens in the World of Acro, we absolutely want to hear about it. We'll do articles for the FIG website. We'll work with you to arrange interviews. We'll share the news on Facebook and Twitter. Sending us news and pictures of honors gymnasts receive, of cool things they're doing when they aren't in the gym, their special projects, anything unusual would be excellent. Please contact the FIG media department at:
